PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of experience building scalable banking applications using React.js, Java, Spring Boot, and REST APIs. Experienced in microservices architecture, modern JavaScript (ES6+), and developing secure digital banking solutions in Agile environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, Python, SQL

Frontend: React.js, Redux, TypeScript, React Router, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST API Development, JWT Authentication, Spring Boot

Databases: MySQL

Tools & DevOps: Git, GitHub, Jenkins, Postman, Vite, Axios, NPM, Webpack

Concepts: OOP, Data Structures, SPA, Microservices Architecture, Agile/Scrum, Jira

PROFESSIONAL EXPERIENCE

Accenture – Pune, India

Advanced Application Development Analyst | Dec 2022 – Present

Tech Stack: React.js, JavaScript (ES6+), Java, Spring Boot, REST APIs, JWT, SQL, Jenkins, Git

- Built and enhanced customer-facing responsive web applications and banking journeys (Registration, Login, Authentication, Approvals) using React.js and JavaScript.
- Translated UX wireframes (Figma) and product requirements into intuitive, responsive, and accessible React.js UI components following modern frontend design patterns and accessibility best practices.
- Designed and integrated RESTful microservices using Node.js and Spring Boot, enabling secure communication between frontend applications and backend banking systems.
- Played a key role in modernizing authentication flows, migrating users from legacy PIN-based login to secure passcode-based authentication, integrating REST APIs with JWT security, Biometrics and Strong Customer Authentication (SCA).
- Collaborated with architects and cross-functional teams to design scalable microservice-based solutions and document technical design decisions.
- Improved overall application performance by ~90% by optimizing API response times, reducing bundle size, minimizing redundant API calls and improving client-side rendering efficiency.
- Automated CI/CD pipelines using Jenkins for build, testing and deployment processes, reducing release turnaround time by ~40%.
- Delivered and maintained critical banking transaction modules including SEPA payments, international transfers, and card e-commerce flows, while supporting production go-lives and resolving live incidents to ensure system reliability.

EDUCATION

Bachelor of Engineering — Information Technology

JSPM Rajarshi Shahu College of Engineering, Savitribai Phule Pune University | 2018 – 2022

PROJECTS

AI Fitness Coach (2026)

Tech: React.js | Tailwind CSS | Node.js | Express | MongoDB | REST APIs | OpenAI API

[GitHub](#) | [Live](#)

- Built and deployed an AI-powered fitness platform with real-time personalized recommendations.
- Developed responsive UI using React.js, React Router, and Tailwind CSS with modular component architecture.
- Implemented Node.js and Express REST APIs for authentication, workout tracking, and calorie management.
- Integrated AI-powered workout and diet recommendations using OpenAI APIs to generate personalized fitness plans.
- Designed scalable full-stack architecture separating React frontend and Node.js API services for modular development and easier deployment.

AI-Enhanced Personal Finance Dashboard (2025)

Tech: React.js | Node.js (Express) | SQL | REST APIs | JWT | GenAI | CI/CD

[GitHub](#)

- Built a full-stack personal finance web application using React.js and Node.js (Express) with secure JWT-based authentication and role-based access control.
- Developed reusable React components and controlled forms to support expense CRUD operations, dashboards, and financial insights visualization.
- Designed and implemented scalable REST APIs with structured SQL persistence (MySQL) for reliable transaction storage and retrieval.
- Integrated GenAI-powered insights to generate personalized spending summaries and recommendations, and set up a GitHub-based CI/CD pipeline to enable automated builds and continuous delivery.

CERTIFICATIONS & AWARDS

- Star Performer of the Month (Accenture) – Feb 2025, Jun 2025.
- Flair & Reward Badge (Accenture) – Recognized for multi-skill proficiency and client delivery.
- Microsoft Azure cloud certifications – AZ-900, DP-900, SC-900, AI-900.
- Microsoft GitHub Copilot certification – GH-300.
- Google Cloud – Agent Deployment (hands-on with AI Console and deployment workflows).
- Volunteered in Accenture Tech Fests and Cyberfest Security Program; supported internal initiatives and promoted security best practices.
